## ANNEXURE "B"

15/04/2020, 14:53 - Reyno De Beer: What is her cell number she sends those intimidating SMS from?  
15/04/2020, 14:53 - Bob Cuts Hair Salon Nkamsheleng Motlhatlhedi: Yes sir  
15/04/2020, 14:54 - Bob Cuts Hair Salon Nkamsheleng Motlhatlhedi: OK let me send  
15/04/2020, 14:57 - Bob Cuts Hair Salon Nkamsheleng Motlhatlhedi: Mellisa.vcf (file attached)  
15/04/2020, 15:19 - Reyno De Beer: Who is staying with you at this property?  
15/04/2020, 15:41 - Reyno De Beer: \*URGENT NOTICE: THREAT OF ILLEGAL EVICTION - F337a THE FOUNDATION\*

Dear Madam,

Our organisation Liberty Fighters Network represents the tenant of the above-mentioned unit, Ms. Nkamsheleng Motlhatlhedi.

We have been provided with SMS's in which you have threatened our member with the criminal offence of illegal eviction with the intention to bring harm to her and her family and she fears that you shall indeed proceed doing it. She now feels threatened and fears for her personal safety and that of her property, which constitutes intimidation as intended in the Intimidation Act, 1982.

In terms of Sections 8(1) & (3) of the Prevention of Illegal Eviction from and Unlawful Occupation of Land Act, 1998 it is a criminal offence to evict any occupier from land without first obtaining a Court order.

\*You are hereby warned not to proceed with your threats and to immediately cease with further intimidation of our member.\*

Failure to comply with this friendly reminder, we shall immediately proceed to open a criminal case against you for illegal Eviction and Intimidation in person and demand your immediate arrest and detention and also proceed with an urgent spoliation application against you in person as the one who made the threats of the illegal acts, and/or your employer, of which all legal costs will be for your account on a punitive scale.

Our member has not received her salary from her employer Bob Cuts Hair Salon who is using the Lockdown as excuse not to pay its 347 employees.

We believe that our member is resultantly protected by way of the common law force majeure read with various clauses contained in the Consumer Protection Act, 2008 and resultantly you have neither any right in law to claim rent nor cancel the lease under the Lockdown and as long as she is being affected by the Lockdown thereafter.

Your failure to negotiate a suitable settlement to make provision for the situation our member finds herself in, is unfortunate and resultantly our organisation will assist our member to defend any action or oppose any application you intend instituting against her.

This is a final notice and not negotiable.

Kind Regards  
Reyno De Beer

# Food parcels as an instrument of politics and corruption

(https://sacoronavirus.co.za/)

Subscribe 142k

**Food parcels for the destitute sounds like a good idea – but it is just too tempting because it allows the ANC to control the process for political gain. No registers, no proper databases, just a total free-for-all as the value of this entire process is eroded.**

Listen to this article

6:19

As South Africa progresses into the fourth week of lockdown, fundamental flaws in government thinking regarding policy and its role in relation to society have been exposed.

The African National Congress has always swung to the left of politics in its belief in big government and the need for the state to be heavily involved in all aspects of the South African economy. In fact not just involved, but often as a way to directly control particular aspects of South African life and dictate the terms of engagement with the populace.

Jordan Griffiths

More (https://www.dailymaverick.co.za/jordan-griffiths/)

Jordan Griffiths was an elected DA city councillor in 2016 local government elections before the role of policy adviser in the mayor's office in Tshwane, serving under the Mmamagang administration. He writes in his personal capacity.

SIGN UP

As the economic reality of lockdown bites, the food parcel has once again emerged as one of the key tools of ANC policy that is deployed to alleviate the suffering of poor communities. The food parcel is a particularly strategic political tool because it speaks to the need for the ANC government to be able to exercise total control over citizens and presents an opportunity to extract economic value as well.

First, a tender for food parcels is issued, a specification is drafted and sent out and companies bid to provide the government with food parcels. Already at this level some value due for the citizens is shaved off because the company in question will have costs associated with creating the food parcels.

Perhaps the company in question is also politically connected or has captured officials within the state and so a food parcel that should cost R500 comes in at R1,000. Alas, more value is lost to citizens. This can become especially rampant in times of crisis when government procurement systems are relaxed to ease the purchase of goods and services to speed up their delivery — this is generally when rampant abuse takes place.

In Mangaung (<https://www.iol.co.za/the-star/opinion-analysis/food-parcel-corruption-claims-must-be-probed-46928380>), allegations emerged that the food parcels were worth R1,200 and contained a 1kg packet of sugar, a tin of sardines, a loaf of bread, a pack of maize meal and head of cabbage.

Second, once created, the food parcels are then duly dropped off at the relevant department which must take charge of distribution and storage. In the case of the Gauteng Department of Social Development, no sooner did this happen when officials involved with the process were accused of giving the food parcels to their own families (<https://citizen.co.za/news/south-africa/society/2269354/da-slams-shameless-gauteng-officials-who-allegedly-stole-food-parcels/>). Of course, another example of how the value of this process is gradually eroded.

*[Handwritten signature]*

Third, examining the distribution network, one of the best ways to secure value at this level is through the use of NGOs which often have databases and can at least ensure that the parcels go to the right people. Of course, the other way is through the use of councillors who immediately politicise and hijack the whole process.

Over the weekend, *News24* (<https://city-press.news24.com/News/councillors-accused-of-looting-food-parcels-meant-for-the-poor-20200419>) reported that in every province in the country excluding the Western Cape there were reported instances of food parcel corruption. Instances were reported of trucks delivering food parcels to the houses of ANC politicians which were then distributed to ANC members, other cases where non-ANC wards were deliberately omitted from receiving food parcels and multiple reports of ANC councillors or members stockpiling food parcels in the run-up to their own branch meetings.

Of course, assuming that after these processes there are still some food parcels that will actually make their way to the people in need, this opportunity can then be maximised by inviting the media over to show how caring the government is, despite having eroded the value of this process right from the supply-chain processes down to the distribution.

Food parcel politics is particularly cruel, not only in the way in which it is politically manipulated, but also in the way that it deliberately undermines individuals and their agency to make decisions that are in their best interest. It is the height of paternalism — instead of thinking creatively on how to actively help the most destitute in society the ANC would deploy government funds to procure food parcels and distribute them — and do it poorly as well.

South Africa is not a rich country. With high levels of unemployment and inequality, the country has to think creatively about how it can best use government funds to help the poor. Food parcels are most certainly not it, they are likely one of the worst ways to derive value from an economic perspective purely because there are so many elements in their

SIGN UP

procurement and distribution chain where value can be eroded.

Assuming that the food parcels distributed were worth R1,200 — what makes more sense, giving people that need it that R1,200 or creating a laborious process to get them a food parcel worth a fraction of that?

It doesn't even need to be cash, it can easily be distributed via vouchers through specific targeted retailers in the country and tied to people's ID numbers. The Sassa grants system already provides support to 18 million South Africans and has the infrastructure in place to distribute funds to the neediest in society.

A petition (<https://www.news24.com/SouthAfrica/News/its-the-absolute-least-we-can-do-call-for-govt-to-increase-child-grants-by-r500-for-6-months-20200419>) is already circulating organised by the Children's Institute at the University of Cape Town to get the government to increase the value of the grant by R500 for a period of six months. It currently has more than 550,000 signatures.

Yet despite the very obvious solution of using these systems and merely increasing the value of the Sassa grants that can be paid for a period of time, the government persists with food parcel politics. It is just too tempting because it allows the ANC the ability to reinforce the fact that it can exercise full control over citizens, it decides what is in the food parcel and it can dictate who gets them. No registers, no proper databases, just a total free-for-all as the value of this entire process is eroded.

South Africans who are receiving social grants understand their situation far better than the government or ANC ever will. Stop insulting them with the distribution of food parcels and assuming you are doing them a service. All these people would rather receive the money that is being spent on the food parcels so that they can make the right decisions for their lives and circumstances. **DM**

Covid-19 has fundamentally changed the world we live in. We worry about our parents, our children, our jobs and lives. This pandemic is the most successful terrorist of all time, leaving the entire world in a communal state of anxiety and fear. Amid the chaos, some good has surfaced: science, the oft-ignored nerdy little brother of popular culture, is finally taking its rightful place in the spotlight. Facts matter. Expertise is, once again, held in high regard.

Journalists have also been categorised as 'essential services'. Our team has been working tirelessly to provide factual information and to ensure that the 24-hour Covid-19 news cycle is written and reported with due care and process. In their careers, they have covered harrowing events but only time will tell if this pandemic will be categorised as 'the worst'. As one of the few online dailies without a paywall, or ever intending to put up a paywall, we welcome every new reader because by having them on our site we know that our public service journalism is working, that we are the trusted source of factual information in a time of wholesale misinformation and outright lies.

**We've got your back. Have you got ours?**

You can back us by joining our community of members who want to be part of our cause. Be part of something meaningful: Defend Truth

By keeping it free for all, it means that every single South African regardless of their economic status has access to the truth.

**For whatever amount you choose**, you can support DM and it only takes a minute.
